

# Diesel Fuel Testing

2007 Promotional Offer

FROM  
THE FARM  
AND

BIODIESEL  
FUELS AND  
BLENDS

INTO YOUR TANK

**NEW**

**B100 Specification, Blend Fractions - B2, B5, B10, B30**

Whether you are using biodiesel, straight petroleum based diesel, or a blend of both, Staveley Services Fluids Analysis has a testing solution to meet your specific requirements. Now that the EMA as well as most diesel engine manufacturers have said "OK!" to biodiesel blends, we have the testing available for you to ensure your fuel or fuel blend meets ASTM or EMA specification - just in time! If you need to guarantee that your fuel is suitable for cold weather service, confirm that fuel held in long term storage is clean and meets specification, or for routine monitoring, call Staveley Services Fluids Analysis today!

## Promotional Offer - Order Now!

Call us to learn how we can help you monitor your diesel for performance, blends and cold temperature specification to keep your equipment running trouble free. If you mention FP-2007, you will receive a 10% discount on your first order of diesel fuel or biodiesel fuel test kits.

But hurry, offer ends December 1, 2007

# 2007 Fuel Testing Capabilities

TEST	METHOD
Accelerated Stability (Fuel)	DuPont F21-61, D6468
Acidity / Distillation Residue	D1093
Additive Blending by Treat Rate	In House
Ash Content	D482
Bacteria Test	Culture Growth
<b>B100 Specification</b>	<b>D6751</b>
<b>Biodiesel Blend Fractions</b>	<b>ENI4708</b>
BTU's, Calculated (Heat of Combustion, includes Sulfur and API Gravity)	D4868
Carbon Residue, Conradson	D189
Carbon Residue, Micro Method	D4530
Centane Index, Calculated (Includes Distillation & Gravity)	D976, D4737
Cloud Point	D2500
Cold Filter Plugging Point (CFPP)	IP309, D6371
Color Test	D1500
Copper Strip Corrosion	D130
Density / API Gravity	D287, D1298
Distillation of Petroleum Products	D86
Flash Point (PMCC) Pensky-Martens Closed Cup	D93
Flash Point (TCC) Tag Closed Cup	D56
Neutralization Number	D974
Particulate Contamination	D6217
Pour Point	D97
Sulfur (Total, X-Ray)	D2622, D4294
Sulfur - Ultra Low (Total) EPA Approved	D5453
Technical Service	Per Quote
Viscosity @ 40C	D445
Viscosity @ 50C	D445
Water by Distillation	D95
Water by Karl Fischer	D6304, E203
Water and Sediment	D2709, D1796

NOTE: Other fuel tests and packages, including biodiesel, are available upon request.

TYPICAL TEST PACKAGES	TESTING PARAMETERS
Package A	Centane Index, Distillation, BS&W, Gravity, Sulfur
Package AW	Package A + Cloud Point, Pour Point
Long Term Storage Package	Package AW + Color, Particulate Contamination, Flash (PMCC), Microorganism Test, Accelerated Stability with Response Test (Note: Inhibitor Response Test is option sample of fuel additive is required if requested).
Winter Package	Cloud Point, Cold Filter Plugging Point (CFPP), Pour Point
Tank Bottom Package	BS&W, Microorganism Test

Please note that all tests may not be available at all locations.  
Contact your local laboratory for details.
